Mikhil Wankhede

Software Engineer | Java & Spring Boot | Payments & FinTech

mikhilwankhede19@gmail.com • linkedin.com/in/mikhil-wankhede-b9398a53 • github.com/mikhil123 • mikhilwankhede.com

SUMMARY

Software engineer building software since September 2018, specializing in scalable backend services and databases with Java and Spring Boot. Currently a Software Engineer II at Worldpay by FIS, a leading FinTech company, working on payment services. M.Tech in Information Security (NIT Calicut). AWS Certified Developer – Associate.

EXPERIENCE

Software Engineer II

October 2021 – Present

Worldpay by FIS

- Developed and implemented an Account Updater Service using Java technologies to improve customer experience and reduce payment declines.
- Owned and documented numerous RESTful web services, playing a key role in their design and implementation from scratch to integration with the Data Access Object (DAO) layer.
- Contributed significantly to project DevOps activities using Docker, Jenkins, OpenShift, and more (Ansible Tower, Opsgenie, Checkmarx, Blackduck, Splunk, Sysdig, Nexus, Venafi, Keytool, SonarQube).
- Championed development best practices including version control, code reviews, unit testing, continuous integration, performance testing, security testing, and comprehensive documentation.

Senior Software Engineer

September 2018 – October 2021

Mosambee

- Utilized Java/J2EE technologies to design and develop web applications for the M-cash Settlement System (automating transaction settlements) and CLEO (a loan collection system).
- Built highly interactive and user-friendly UIs using JavaScript, HTML, JSP, and CSS to enhance application functionality.
- Played a pivotal role in designing and implementing the pricing engine and risk management functionalities for transactions.
- Mentored, coached, and trained software trainees, fostering knowledge transfer within the team.
- Collaborated with cross-functional development teams to implement solutions, troubleshoot issues, and conduct code reviews.
- Adhered to development best practices such as version control, unit testing, continuous integration, performance testing, security testing, and thorough documentation.

SKILLS

Backend & Data	Java, Spring Boot, Spring Security, Spring, Apache Spark
Databases	PostgreSQL, MySQL, Cassandra
Cloud & DevOps	AWS, OpenShift, Ansible Tower, Venafi, Docker, Jenkins, Splunk, Sysdig, Blackduck, Opsgenie, Checkmarx
Frontend	JavaScript, HTML, CSS/SASS, AngularJS

PROJECTS

Stock Market Predictive System (github.com/mikhil123/stock-market-predictive)
Full-stack Java + Python project that predicts Indian stock price trends using real-time market data, financial statements and news sentiment analysis. Uses historical data (Yahoo Finance) to detect upward or downward trends and Hugging Face transformer models (distilbert-base-uncased) for headline sentiment classification.

Memory Card Game (mikhil123.github.io/CardFlipGame)

A simple memory card flip game built with HTML, CSS, and JavaScript.

EDUCATION

M.Tech, Information Security – National Institute of Technology, Calicut 2017

B.E. Information Technology – Government College of Engineering, Aurangabad 2014

CERTIFICATIONS & COURSES

AWS Certified Developer – Associate (Amazon) December 2024

Apache Spark with Scala – Hands On with Big Data (Udemy) April 2025

Practical OpenShift for Developers – OpenShift 4 (Udemy) March 2022

Spring Framework for Beginners with Spring Boot (Udemy) February 2021

SQL and Relational Database 101 (Cognitive Class) January 2021

Certified Java Trainee (Jspider Class) August 2018
